CONTACT

Our company has been operating in the market since 2004.

In the beginning we worked together with clients who trusted us and who continue to do so at present.

In the last years we have experienced an important growth based on the contracts obtained for the different solutions we offer and implement, in Data Centers, Distribution nodes, electrical distribution systems, Structured cabling, Fiber optic Connectorized, Backbone network maintenance and associated facilities.

We have specialized professional and technical staff and equipment and means necessary to service complex and vital facilities, telecommunications and AC / DC power distribution; we have availability for the execution of tasks at atypical schedules and for attention with 7x24 hs system. for any eventuality that may arise.

MISIÓN

Accompany our clients when defining the communication network to adopt, providing them with the necessary resources to optimize their investment.

VISIÓN

To be the leading company of integral telecommunications network infrastructure solutions.
